

LICENSED SOFTWARE INSTALLATION REQUEST MANAGEMENT

ServiceNow Service Catalog

COMPLETE STEP-BY-STEP PROJECT DOCUMENTATION

1. Project Overview

This project automates an employee's request for licensed software installation using ServiceNow Service Catalog and Flow Designer.

The employee submits the request, ServiceNow creates the REQ/RITM, the Software Manager approves or rejects it, and the approved path creates a Catalog Task for the Software Support Team/Software Group. The Requested Item is updated and the requester receives notification as part of the completed automation.

2. Project Objective

The objective is to replace a manual software-installation process with a controlled ServiceNow workflow. The solution captures the required software information, obtains approval, conditionally creates fulfilment work, assigns the work, updates the RITM and communicates the outcome to the requester.

3. Overall Architecture

Employee → Licensed Software Installation Catalog Item → Catalog Variables → REQ/RITM → Flow Designer → Software Manager Approval → Approval Decision → Create Catalog Task → Software Support Team / Software Group → Update Requested Item → Notification → Fulfilment.

4. Step 1 – Update Set

Create/use the Update Set named Licensed Software Installation - Development. Keep it as the current Update Set while building the project, capture the catalog item, variables, flow and related configuration, review Customer Updates, and package the completed configuration for deployment/backup.

5. Step 2 – Catalog Item

Create Licensed Software Installation under the Service Catalog. This item is the employee-facing request form. Configure it so the employee can submit a software installation request and attach the catalog variables to the item.

6. Step 3 – Catalog Variables

Configure six mandatory variables: Software Name (Select Box), Software Version (Single Line Text), Business Justification (Multi Line Text), Installation Device (Select Box), License Type (Select Box), and Required By Date (Date). Controlled choices are used for the appropriate fields.

7. Step 4 – Verify Catalog Item

Verify Licensed Software Installation in the Catalog Items area and open the request form to confirm that the configured variables are available.

8. Step 5 – Flow Designer Trigger

Open Flow Designer and use the flow Licensed Software Installation - Approval and Fulfillment. Add the Service Catalog Requested Item trigger so the flow starts from the RITM created by the catalog submission.

9. Step 6 – Software Manager Approval

Add Ask For Approval for the Trigger Requested Item and configure the Software Manager as approver. When a request is submitted, the approval record is created and can be reviewed in the Approvals area.

10. Step 7 – Approval Decision

Add Flow Logic → If. Configure the condition using the approval output: Approval State is Approved. Only the Approved branch continues to fulfilment.

11. Step 8 – Create Catalog Task

In the Approved branch, add Create Catalog Task. Use Catalog Task [sc_task], link it to the Trigger Requested Item, use the short description Install Licensed Software, assign it to Software Group/Software Support Team and configure the appropriate fulfilment member.

12. Step 9 – Update Requested Item

After task creation, use Update Requested Item Record with the originating RITM. This keeps the request status/stage aligned with the automated process.

13. Step 10 – Publish/Activate Flow

The completed sequence is Trigger → Ask For Approval → If Approval State is Approved → Create Catalog Task → Update Requested Item Record. The supplied evidence shows the flow published/active.

14. Step 11 – Approval Testing

Test the process by submitting requests and checking the Software Manager approval. The supplied evidence demonstrates both Approved and Rejected approval outcomes.

15. Step 12 – Approved RITM / Fulfilment

RITM0010027 shows Approval = Approved and Stage = Request Approved. The delivery plan contains the Install Licensed Software task, demonstrating that the approved request reached fulfilment.

16. Step 13 – Catalog Task Verification

The Catalog Task is generated only through the approved branch and is associated with the originating RITM. The configured assignment is Software Group/Software Support Team with the selected fulfilment member.

17. Step 14 – Update Set Verification

The project configuration is captured in Licensed Software Installation - Development. The supplied evidence shows the Update Set and Customer Updates = 22.

18. Step 15 – Notifications – COMPLETED

Notifications are included as completed project functionality. The notification is associated with the Requested Item process and communicates the request outcome to the Requested For employee. This completes the communication portion of the automation.

19. Step 16 – Final Packaging

Review the Update Set, confirm all final configuration—including the notification—is captured, complete the Update Set, and export it as XML when required for backup or deployment.

20. End-to-End Execution

1) Employee opens the Service Catalog. 2) Selects Licensed Software Installation. 3) Enters the six required values.
4) Submits the request. 5) REQ/RITM is created. 6) Flow starts. 7) Software Manager approval is requested.
8) Approval is checked. 9) Approved requests create Install Licensed Software Catalog Task. 10) Task is assigned to Software Support Team/Software Group.
11) RITM is updated. 12) Requester notification is sent. 13) Support team completes fulfilment.

21. Final Project Status

Completed: Catalog Item, six variables, REQ/RITM creation, Flow trigger, Software Manager approval, approval decision, Catalog Task creation, assignment, RITM update, active flow, approval testing, notifications and Update Set capture.

22. Conclusion

The project demonstrates a complete ServiceNow Service Catalog automation scenario: request capture, approval, conditional fulfilment, task assignment, RITM update, requester notification and Update Set packaging. The screenshots below provide the supplied evidence from the project work.

23. Catalog Variable Reference

Variable	Type	Mandatory
Software Name	Select Box	Yes
Software Version	Single Line Text	Yes
Business Justification	Multi Line Text	Yes
Installation Device	Select Box	Yes
License Type	Select Box	Yes
Required By Date	Date	Yes

24. Screenshot Evidence – All Supplied Screenshots

Screenshot 1

The screenshot shows the 'Licensed Software Installation' catalog item form in ServiceNow. The form includes fields for Software Name (Microsoft Office), Software Version (Microsoft Office 2024), Installation Device (Laptop), License Type (Per User), Business Justification (Software is required for project development and testing), and Required By Date (2026-08-05). On the right, there is an 'Order this Item' section with a quantity of 1, a delivery time of 2 days, and buttons for 'Order Now' and 'Add to Cart'. A 'Shopping Cart' section below shows it is empty.

Request installation of licensed software on a company device.

* Software Name
Microsoft Office

* Software Version
Microsoft Office 2024

* Installation Device
Laptop

* License Type
Per User

* Business Justification
Software is required for project development and testing.

* Required By Date
2026-08-05

Screenshot 2

The screenshot shows the 'Catalog Items' list for the 'Licensed Software Installation' catalog item. The table lists 6 items with columns for Type, Question, and Order. The items are: Select Box (Software Name, Order 100), Single Line Text (Software Version, Order 200), Select Box (Installation Device, Order 300), Select Box (License Type, Order 400), Multi Line Text (Business Justification, Order 500), and Date (Required By Date, Order 600).

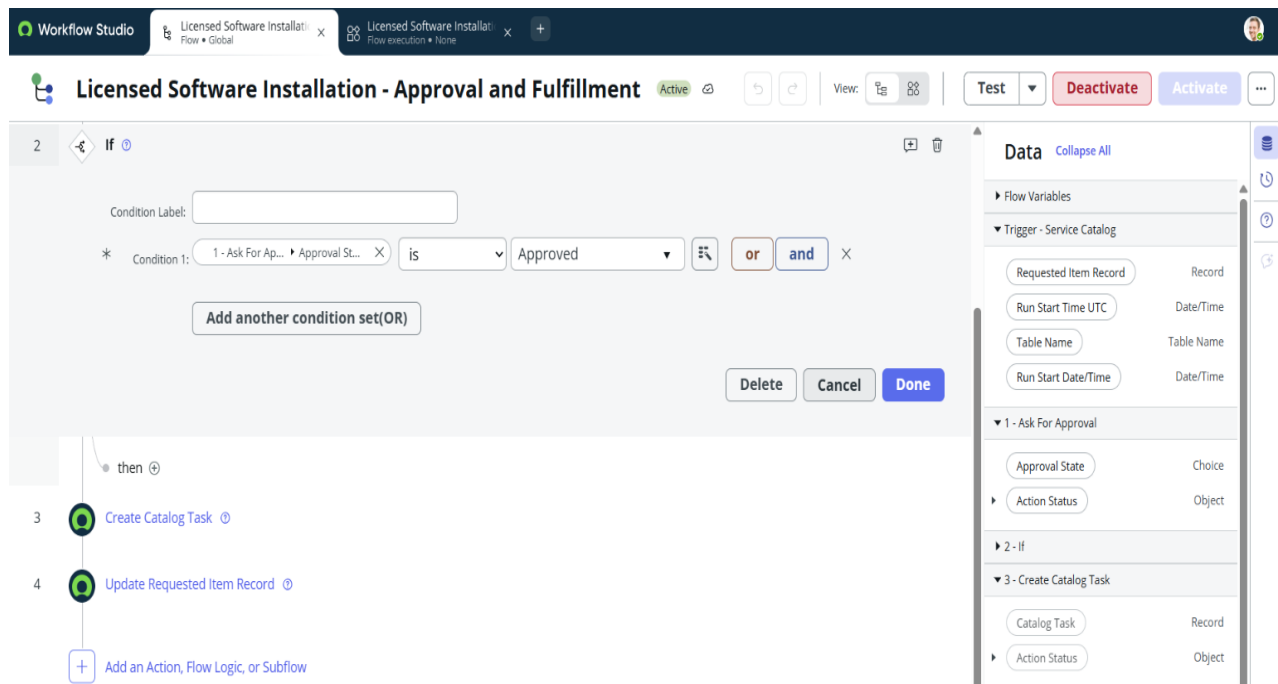

Figure 4: Complete Flow Designer overview

Screenshot 5

The screenshot displays the 'Create Catalog Task' configuration in Workflow Studio. The interface includes a top bar with the 'Workflow Studio' logo and tabs for 'Licensed Software Installation - Flow - Global' and 'Licensed Software Installation - Flow execution - None'. The main title is 'Licensed Software Installation - Approval and Fulfillment', which is marked as 'Active'. Below the title, there are buttons for 'Test', 'Deactivate', and 'Activate'. The configuration is divided into two main sections: 'Action Properties' and 'Data'.

Action Properties:

- Action:** Create Catalog Task
- Action Inputs:**
 - Table Name:** Catalog Task [sc_task]
 - * Requested Item (Requested Item):** Trigger -> Requested Item ...
 - Short Description:** Install requested licensed software
 - Assignment group:** Software
 - State:** Open
 - Priority:** 3 - Moderate

Data:

- Flow Variables:**
 - Trigger - Service Catalog:**
 - Requested Item Record (Record)
 - Run Start Time UTC (Date/Time)
 - Table Name (Table Name)
 - Run Start Date/Time (Date/Time)
 - 1 - Ask For Approval:**
 - Approval State (Choice)
 - Action Status (Object)
 - 2 - If**
 - 3 - Create Catalog Task:**
 - Catalog Task (Record)

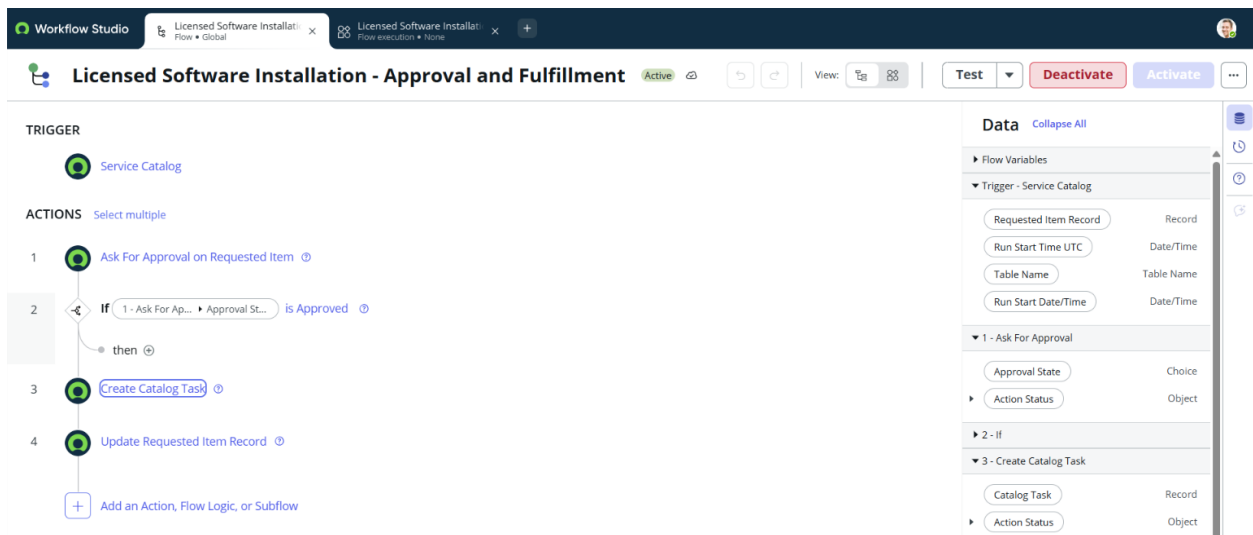

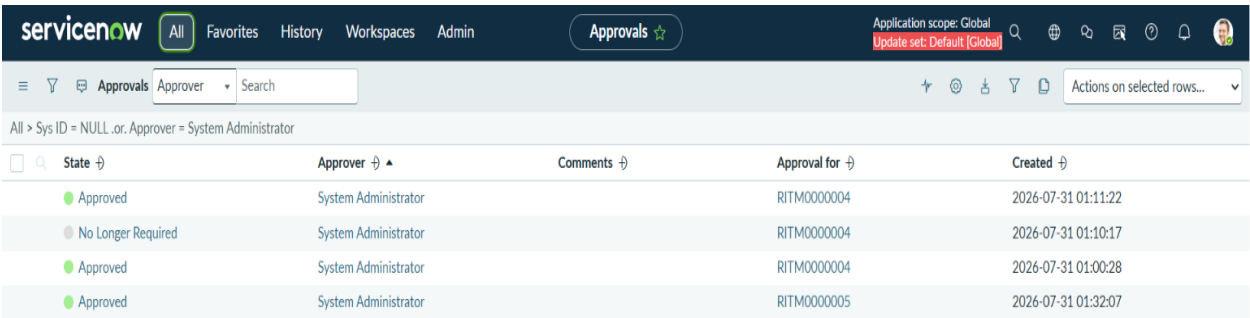

Figure 6: Published/active flow

Screenshot 7

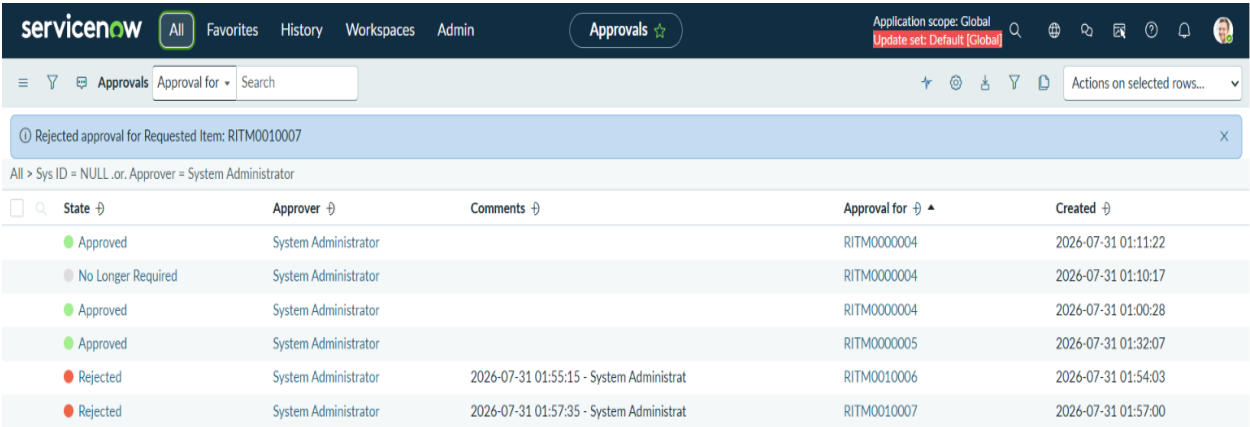

The screenshot shows the ServiceNow 'Approvals' page. The top navigation bar includes 'servicenow', 'All', 'Favorites', 'History', 'Workspaces', 'Admin', and 'Approvals'. The 'Approvals' section is active, showing a search bar and a filter dropdown set to 'Approver'. Below the navigation bar, a filter bar indicates 'All > Sys ID = NULL .or. Approver = System Administrator'. The main table displays a list of approval records with columns: State, Approver, Comments, Approval for, and Created. The records show four 'Approved' entries by 'System Administrator' for various RITM IDs, with creation times ranging from 2026-07-31 01:10:17 to 2026-07-31 01:32:07.

State	Approver	Comments	Approval for	Created
Approved	System Administrator		RITM0000004	2026-07-31 01:11:22
No Longer Required	System Administrator		RITM0000004	2026-07-31 01:10:17
Approved	System Administrator		RITM0000004	2026-07-31 01:00:28
Approved	System Administrator		RITM0000005	2026-07-31 01:32:07

Figure 7: Software Manager approval records

Screenshot 8

The screenshot shows the ServiceNow 'Approvals' page with a notification bar at the top stating 'Rejected approval for Requested Item: RITM0010007'. The filter bar remains the same as in Screenshot 7. The main table displays a list of approval records, including two 'Rejected' entries by 'System Administrator' for RITM0010006 and RITM0010007, with creation times of 2026-07-31 01:54:03 and 2026-07-31 01:57:00 respectively. The table also includes the same four 'Approved' entries as in Screenshot 7.

State	Approver	Comments	Approval for	Created
Approved	System Administrator		RITM0000004	2026-07-31 01:11:22
No Longer Required	System Administrator		RITM0000004	2026-07-31 01:10:17
Approved	System Administrator		RITM0000004	2026-07-31 01:00:28
Approved	System Administrator		RITM0000005	2026-07-31 01:32:07
Rejected	System Administrator	2026-07-31 01:55:15 - System Administrat	RITM0010006	2026-07-31 01:54:03
Rejected	System Administrator	2026-07-31 01:57:35 - System Administrat	RITM0010007	2026-07-31 01:57:00

Figure 8: Approved and Rejected approval records

Screenshot 9

The screenshot displays the ServiceNow interface for a Requested Item (RITM0010004). The top navigation bar includes 'All', 'Favorites', 'History', and 'Workspaces'. The main header shows the item name and a star icon. Below this, the 'View: Self Service' tab is active. The form fields include 'Number' (RITM0010004), 'Due date' (2026-08-02 00:59:10), 'Approval' (Approved), 'Quantity' (1), and 'Stage' (Assess or Scope Task). A table titled 'Delivery Plan Status for: Request installation of licensed software on a company device.' lists tasks: 'Assess or Scope Task' (1 Day, Expected Start: 2026-07-31, Started: 2026-07-31, Completed) and 'Provide requested service' (1 Day, Expected Start: 2026-08-01). Below the table is a rich text editor for the 'Description' field, which is currently empty.

Task	Duration	Expected Start	Started	Completed
Assess or Scope Task	1 Day	2026-07-31	2026-07-31	
Provide requested service	1 Day	2026-08-01		

Figure 9: RITM0010027 approved request and fulfilment task

Screenshot 10

This screenshot is identical to the one above, showing the ServiceNow interface for Requested Item RITM0010004. It displays the same form fields, table, and rich text editor.

Task	Duration	Expected Start	Started	Completed
Assess or Scope Task	1 Day	2026-07-31	2026-07-31	
Provide requested service	1 Day	2026-08-01
